Elise 2.0 out of 5 stars In all fairness, it has worked ok much of the time. I also agree with the reviewer who said that the refill cartridges are difficult to load I have loaded 2 of them and its taken me close to an hour each time, with lessthanperfect results in the end due to misalignment. I recently bought the Scotch thermal laminator and am so far very happy with it.

Zero wrinkles so far, and no issues with loading the individual sheets through the machine. I have to say that I use this cold laminator almost 10 times as much. It is so easy to use and it gets the job done. The plastic lamination film is just as durable as the heat laminators. I am particularly fond of its ability to laminate legal size papers without needing to buy offsize lamination film. It has its own

film cutter instead of needing a scissors. The film cartridges are easy to change. Overall, I believe the cost would be about the same in the long run when comparing it to a heat laminator without the safety concerns for toddlers. My wife loves it for its portability for scrapebooking parties. Some of the great features that I find, apart from doing a great job at laminating, are My daughters love to take part in the process with no fear of getting burnt I just use the right amount of plastic each time Ive plastified pics, learning cards you can actually use white board markers on it, being able to erase it later, multiple crafts and still havent finished the first roll that came with it My sister is tired of hearing me talking about it, but I believe shell end up buying one when she finds a spot to put it. We have one at each of our businesses. We bought this for our office and the employees and staff use it ALL THE TIME. Very easy to use and provides long lasting laminating. The newer more high tech one have nothing on this bad boy! HA. Its so simple to use no heat no thermals just the simple turning of a crank. Simple is often better and that is definitely the case here. I use the tool to laminate spec sheets for selling high end sports cars and the result is super professional. I suggest also getting a paper cutter from staples because you may want to trim up the end product. One minute after it arrived I was hooked. This thing is incredibly easy to use, and it does a great job. Just turn the crank and out comes the professional looking product.

Please try again It requires NO ELECTRICITY, which means it doesnt use heat to seal the plastic. Its easy to use just stick your paper item into the back and crank the handle. The plastic roll is designed to encase your item, sealing it as it moves through the unit. Use the cutter to cut it from the roll and you are done. Quick, neat, tidy and perfect every time. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again The first one lasted over seven years of office use by many different people. We use it for signs and to protect items posted on the bulletin board. You do have to be careful that the paper feeds through perfectly flat and that you dont roll it through too fast, or it may be wrinkled between the laminating layers. That is annoying, but for the majority of the time its fine, and so quick and easy. The film included is indeed very thick laminate. Most suitable for signs and outdoor applications. Gregg 2.0 out of 5 stars Inserting this new cartridge is not always a breeze and you waste some plastic. What I like about it is that you can laminate longer material than just the standard letter size document. And the laminator doesnt have to warm up. But the price of these refill cartridges have increase by about 30% in a few months. They were already expensive. As a result, I don't use this laminator nearly as much anymore and most of my lamination is done by a much more affordable Scotch thermal. It was much cheaper to buy and to operate.Cest super quil soit disponible sur Amazon!Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again The laminator was a good buy. I have not needed to replace the first refill yet, which means you get a lot of bang for your buck with these refills. The laminator, itself, is great, though you need to be careful that you feed the paper in straight, else you sometimes get uneven edges. In fact, a few times the paper moved to such a degree, a corner was outside the part laminated. This wasnt a problem for me, as they were not business papers. Doing business or professional papers, I am much more careful and feed the sheets in more slowly to avoid movement.

You can keep you hand, lightly, on the page while slowly turning the hand crank to feed the paper into the machine to be laminated on both sides.Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Does a great job, doesnt leave bubbles or air pockets and from our research, cold laminating is better for inkjet documents. We are very pleased and Amazon has the best price and with free shipping, you cant go wrong.
