The Brother ML100 offers a sensible solution for users who need a reliable, take anywhere typewriter for home, school, or the office. This entry level typewriter from Brothers ML series comes with such essential automatic features as automatic paper insertion to properly insert each page to a uniform 1 inch top margin and the automatic WordOut correction system to erase mistakes with one simple stroke of a key. The Brother ML100 offers a sensible solution for users who need a reliable, take anywhere typewriter for home, school, or the office. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Kimchee one 2.0 out of 5 stars They don't last. Very minimal usage. They tend to break at somewhere near the daisy wheel. Either the wheel gets jammed or some type of calibration gets knocked off. I would expect the quality of the typewriter to be better than what we have experienced. Like I stated, this machine has been used very minimally. We probably used it once every two to three months to type some labels. It is a little louder than I expected but it makes me feel like a true author who is cooking up classics when the keys clank. Replacing the ribbon and correction tape was easy and the various symbols on the daisy wheels are helpful. Highly recommended unless you're looking for something quiet. Apparently something, were not sure what, broke and it won't hold the paper. Luckily there is someone local who services Brother, so we didn't have to send it out, but it's still there and will be for probably a

week. Our use is light office use, mostly forms that can't be done on the computer. Other than that it was working fine, adequate for our needs, and we were happy with it.
<http://www.tractorpulling-emmeloord.nl/upload/d9854-manual.xml>

We called Brother to troubleshoot and they said it was the Daisywheel and we needed to buy a new wheel and that it was not a part covered under the warranty even though the machine was brand new and this was first time use. I will be returning this and not buying another Brother product if this is the kind of support they offer on their products. Horrible customer service when we called in the problem. He read the instruction and loves using it. My only disappointment is that the print ribbon. My only disappointment is that the print ribbon and correction tape ribbon were completely used up and I had to purchase new ones. Hard to find the correction tape ribbon at stores. Also I was hoping there would be a manual with the typewriter and there wasn't one. Glad that I could still find a typewriter for completing forms. Unfortunately as the typewriter was going to Italy to my aged aunt upon receiving it she could not plug it in and had to buy an adapter but the typewriter failed to work. Therefore they ended up replacing the plug on typewriter with a new one. It still did not work. Unfortunately I did not find about any of this until today. As I have been out of the country for the last 5 weeks, so I could not advise her what to do next. As you can imagine I am extremely disappointed with the supplier, and feel that I have been let down as I have bought a lot of items through Amazon and feel at a loss as to how I proceed from here. I would be pleased to know your response on this matter. Yours Steve Lea

Would this work
It is a mechanical device, that works by pressing an embossed letter in the daisy wheel through a inked tape into the paper.

Look for page 16 last page of the manual for a list of cassette daisy wheels. No longer supported by Brother. Next time spend a little more money and purchase a Nakajima typewriter. Would this work
Loud noise remains and power light is red. Answer questions, earn points and help others.
